Introductory Remarks

The subject application is owned by a University and exclusively licensed to a small biotechnology company. We have finite resources and hope to draw this prosecution to a close around meaningful patent protection for the described invention. To do that, we aim to work with the Examiner to focus on the tests of patentability and the wording of our claims. What follows is presented in that spirit. We earnestly solicit the Examiner's consideration of our remarks and amendments. In the unfortunate event that these prove unsuccessful, our Notice of Appeal is included as Attachment C.
